RE: Sprint Generator Amendments

To whom it may Concern,

Previously Sprint had entered into agreements for the installation of wireless communication sites and then amended the agreements to allow for backup generators at 4 different school locations, Old Atlantic High School, Boca High School, Calusa Elementary, and Okeehoelee Middle School.

Since the execution of the generator amendments Sprint has modified their policy on the placement of backup generators at their antenna locations. Due to this change no generators were installed at these locations and Sprint would like to terminate the generator amendments for the 4 locations referenced above.

We look forward to continuing our mutually beneficial relationship with the School District, and apologize for any inconvenience we may have caused you or your staff.

Sincerely,

Michael Reed
Authorized Representative
