

On November 8, 2012, Board Member Chuck Shaw requested information regarding Board Meeting 11/20/12 PR-1 Cancellation of Sprint Spectrum Lease Amendments for Generators at Okeeheelee MS, Calusa ES, Boca Raton HS and Plumosa ES. A response is provided below.

Question: What is left of the leases for the towers at each school and revenue received at each?

Response:

The School Board has cellular communication towers on nine (9) school sites and one non-instructional District owned property. The agreements were negotiated between the years of 1994-96, with the exception of Western Pines ES that was executed on 8/31/2005. Please refer to the attached chart, which provides detailed information regarding the lease terms and revenue collected for each site.
